

// **COMMERCIAL LAUNDRY SERVICES**
CANADA

Fast. Reliable. Environmentally friendly.

Civeo's state-of-the-art commercial laundry facilities provide fast, reliable service, and automated hygienic processes that are light on the environment.

WHO WE SERVE

Hospitality

- Hotels and Resorts
- Workforce Lodging
- Restaurants
- Leisure Facilities

Healthcare

- Hospitals
- Clinics
- Long-Term Care Facilities

SUSTAINABLE BLUOX™ TECHNOLOGY

Using environmentally friendly Bluox™ Laundry technology, our cleaning processes use elevated concentrations of oxidized water to significantly decrease the amount of chemicals, detergents, and hot water used when compared to traditional laundry cycles. This process eliminates all microorganisms, while increasing the life of your linens.

Key Benefits:

- Energy efficient with less hot water consumption and shorter drying times
- Eliminates all microbiological activity in laundered linens
- Extends linen life by up to 20%
- Fresher smelling, whiter, and brighter linens

PROCESSES YOU CAN RELY ON

High-Volume Processing Capacity

Civeo's laundry facilities have the capacity to process over 3,000 lbs an hour. This capability results in quick turnaround times so you can avoid having to carry the cost of excess linen inventories.

Hygienic Automated Processes

Civeo's laundry operations are highly automated with programmable folding stations, significantly decreasing human contact and the potential for contamination.

Computerized Tracking and Reporting

As part of our quality control measures, Civeo offers computerized tracking systems to monitor every item's journey through key stages of the wash process including soiled sorting, item classification, washer designation, dryer transfer, clean processing, and folding.

Our reporting system can also provide customers with detailed information including how much of each item was washed, when it was washed, the wash formula used, and the machine it was washed in.

BUILD, OWN, OPERATE MODEL

Do you operate in a market where access to high-volume commercial laundry is under-served? Our experience in the design, finance, construction, and operations of commercial laundry facilities can help fill the void while helping you to preserve capital to focus on your core business.
